WEATHER SYNOPSIS BY REGION

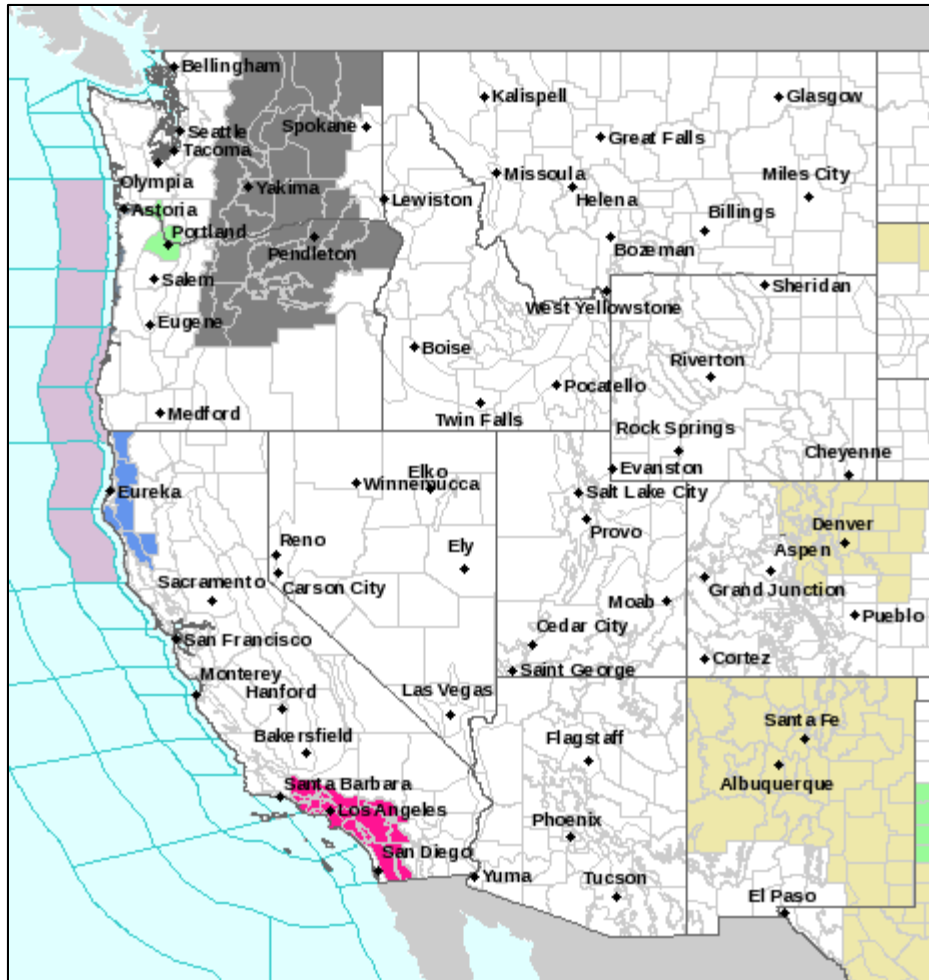

NORTHERN CALIFORNIA

SOUTHERN CALIFORNIA

- A weak low pressure area will generate offshore winds today and Saturday, mainly during the night through morning hours. Wind speeds should be much lower than the winds that occurred Monday. Temperatures will remain above normal the next few days before a cooling trend occurs Sunday. Isolated showers will be possible in and near the desert over the weekend, but otherwise, no precipitation is expected through the end of next week.
- High temperatures in the upper 50s and 60s in the mountains to the 80s at lower elevations today. Temperatures cooling 2-3 degrees Saturday and Sunday. Well above normal temperatures with light winds will occur during the second half of next week.
